### Keeping up with Cheetahs

All dual language editions of this book are TalkingBook enabled, see PredLIRI for available audio. Cheetahs are the fastest land animals, able to run as fast as 120 km per hour. Their long legs and powerful tail help them to reach such speeds. In the wild, cheetahs live in the savannas and grasslands of Africa. They are solitary animals, usually found alone except when they mate or raise their young. Cheetahs are also known for their distinctive black spots.
